GMS HOSTING SERVICES UPDATE

Spammers, hackers, and IT thugs are at it again. It only gets worse, but we continue to fight back. GMS recently doubled hard drive space and increased RAM by 33% to better handle malicious code and incoming spam. Our anti-virus definitions are updated twice daily and every account on our server is protected. The costs of these improvements were not passed on to the network, as we will do everything in our power to deliver reliable, hassle-free hosting to the network – FREE!

COMPUTER PROBLEMS BYTE!

Recently, an article in the Wall Street Journal mentioned that many people were getting so frustrated by spam and viruses slowing down their computers that they were simply shutting them off. WOW! Back to the old pen and paper? Well, although you may not have gone that far, we know that computer problems are extremely annoying and can make you want to throw your computer out the window. Don't do it! GMS is here to help. We want you to take a deep breath, relax, and put that monitor back on your desk. Visiting you in person, providing training, and making sure your computer is set up properly are all benefits of membership. Just drop us a line!

GMS doesn't just want to provide you with "cheap" hosting services. We want to deliver the best hosting services you will find – period. We are emotionally attached to every member; our goal is to remove headaches so you can get back to your business and making money. Every member has (or should have, if you don't) our personal cell phone numbers for emergency situations or questions. We are never too busy to answer your questions. Please call us anytime for any reason.
